Henry Rayner

Boston, MA • henryrayner0@gmail.com • (401) 662-6686

Full-stack software engineer with experience designing and developing web applications using React, TypeScript, Python, and AWS in Agile environments. Experienced in modernizing legacy applications, developing RESTful APIs, and collaborating with cross-functional teams to deliver reliable, maintainable software. Strong engineering fundamentals with enthusiasm for learning new technologies and building high-quality user experiences.

Education

Brown University, *B.A. in Computer Science* May 2022 | Providence, RI

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Deep Learning, Computer Systems, Computer Vision, Graphics, 2D Game Engines

Experience

Capital One, *Associate Software Engineer* Aug 2022 - Oct 2024 | Cambridge, MA

- Built and delivered full-stack features for internal applications using React, TypeScript, and Python on AWS, owning feature development through testing, deployment, and production support.
- Designed, documented, and implemented RESTful APIs and backend services to support enterprise applications and reliable data exchange.
- Collaborated with Product and Design to translate Figma designs and business requirements into accessible, responsive web applications.
- Developed reusable React component libraries, improving development speed, maintainability, and code consistency across applications.
- Modernized legacy Java and Angular applications into React and TypeScript microservices, improving scalability, maintainability, and application performance.
- Debugged and resolved complex production issues across frontend and backend systems, improving application reliability and software quality.
- Optimized SQL queries across PostgreSQL and Snowflake to improve application performance and support efficient data retrieval.
- Implemented Docker-based development workflows and CI/CD pipelines using Jenkins to streamline deployments.
- Participated in peer code reviews, technical design discussions, and Agile ceremonies, contributing to high-quality software and maintainable system design.

Technologies: React, TypeScript, Python, AWS, PostgreSQL, Snowflake, Jenkins, Docker, Java, Angular

Northrop Grumman, *Software Development Intern* Jun 2020 - May 2022 | Newport, RI

- Developed software applications using C#/ .NET , focusing on performance and stability in simulation environments.
- Debugged and optimized complex applications, improving system efficiency, stability, and overall software quality.
- Worked collaboratively within structured software development processes, contributing to software delivery, documentation, and cross-team coordination.

Technologies: C#, C++, .NET

Skills & Certification

Programming: TypeScript, JavaScript, Python, Java, C#, C++
Frontend: React, Redux, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Angular
Backend & Infrastructure: Node.js, RESTful APIs, SQL, PostgreSQL, AWS, Docker, Jenkins, Snowflake, .NET
Tools & Platforms: Git, Jira, GitHub Copilot, AI Assisted Development, Postman, VS Code, Lucidchart, Figma
Certification: AWS Certified Solutions Architect - Associate

Leadership and Activities

CODEPATH, *Technical Coach* 2022-2025

Mentored students in data structures, algorithms, and full-stack development, emphasizing debugging and problem-solving skills

CAPITAL ONE CODERS, *Mentor* 2022-2024

Guided middle school students in Boston through web development projects and an introduction to software careers.
